

Manual cutting bow

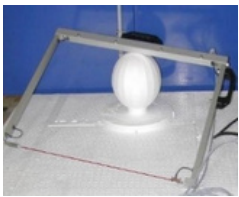

The manual cutting bows are simple and portable tools. They are used to cut hot melt foams as well as many materials such as EPS, XPS, PE, EPP... Essential in the insulation field, they will allow you to cut to length all of your panels on site and everywhere.

ADVANTAGES

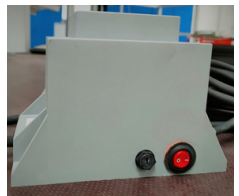

- › Fast and effortless slicing
- › Easy and clean cuts: noiseless and dust-free
- › Light device
- › Wire replacement: fast and user-friendly
- › Wire shelf life: about 1 000 hours under normal conditions of use
- › 1 year warranty
- › CE standard

TECHNICAL DATA

S MODEL

CONTROLLER and ON / OFF button

TECHNOLOGY

- Hot wire

CUTTING WIRE

- Nickel / Chrome base, delivered with 5 spare wires

WIRE DIAMETER

- Ø 0.5 mm

STRUCTURE

- Stainless anodized aluminum

HANDLE

- Comfortable and convenient grip

CABLE

- 7.5 m between the controller and the bow

HEATING OF THE WIRE

- Immediate, constant and non-adjustable

VOLTAGE

- 115 VAC or 230 VAC

MAXIMUM CONSUMPTION

- 350 VA

MODELS

Cutting capacities	S	XL
Working length of the cutting wire (mm)	630	1250
Cutting height (mm)	400	400
Controller dimensions (mm)	L = 270, l = 170, h = 86	L = 270, l = 170, h = 86

The dimensions can be customized upon request, do not hesitate to **contact us** for more information.
