

CROMA

cutting machine

INDUS Series

CROMA' specialty since its inception, the industrial machines are renowned worldwide for their versatility, high quality and strength. The reinforced frames are tailored to the dimensions you need, and CROMA offers a wide range of options and functions to customize your machine: cutting harp up to 40 wires, pneumatic turntable, conveyors... Get a guarantee of reliability, by choosing an equipment that will meet your needs and requirements for the upcoming decades.

525 MODEL

ADVANTAGES

- › Steel guidance, with high precision bearing
- › Independent axes, with 120 mm wire extension
- › Double reinforced frame: The robust structure of the machine can withstand the loading & unloading of the heaviest blocks, with intensive production rates
- › High dimensions available: standard machines up to 6 meters long
- › Included with this model: PC housing, speed adjustment during the cutting process, remote control
- › CROMA software recognized as the most efficient and intuitive on the market
- › 2 years warranty

TECHNICAL DATA

ROTATIVE HARP

REINFORCED HARP
wire positioning every mm

TECHNOLOGY

- 4 to 5 axes

ENGINES

- Stepper motor

MAXIMUM SPEED

- 3.2 m / min

ACCURACY

- ± 1 mm

RESOLUTION

- 0.1 mm

REPEATABILITY

- 0.05 mm

CUTTING WIRE

- Nickel / Chrome base, delivered with 5 spare wires
- Ø 0.3 mm

NUMBER OF WIRES

- Up to 12 cutting wires (option)

CUTTING TABLE

- Reinforced wood, 13-ply

GUIDANCE

- Linear ball bearing

STRUCTURE

- Stainless anodized aluminum

HEATING

- External potentiometer

WIRE EXTENSION

- 120 mm or 25 °

SOFTWARE

- FAOMA and Cromo Output

IMPORT FILES

- .PLT .DXF .STL

INTERFACE

- Windows XP, 7, 8, 10

CONDITIONS OF USE

- 0 ° C to 50 ° C

CONNECTION

- RJ 45, 2 ethernet cards required

POWER SUPPLY

- 230 VAC or 115VAC

MODELS

| Cutting capacities | 321 | 421 | 323 | 424 | 521 | 525 | 621 | 626 |
|-------------------------------------|-------|-------|------|------|-------|------|-------|------|
| X (Horizontal movement - mm) | 3050 | 4050 | 3050 | 4050 | 5050 | 5050 | 6050 | 6050 |
| Y (Vertical stroke - mm) | 2050 | 2050 | 2050 | 2050 | 2050 | 2050 | 2050 | 2050 |
| Z (Working length of the wire - mm) | 1300* | 1300* | 4050 | 4050 | 1300* | 5050 | 1300* | 6050 |

*This machine can be equipped with the wire reduction system and with the Stratoconcept Software.

CROMA · INDUS SERIES

OPTIONS

SPEED ADJUSTMENT AFTER STARTING - INCLUDED -

Very convenient to adapt the cutting speed according to the material you are working with. This feature enables adjusting the initial movement of the wire by +/- 50%

REMOTE CONTROL - INCLUDED -

Manual control of many features, such as:
Speed setting (slow / fast).
Turntable driving (in both directions).
Start, pause or stop the cutting.
Bring your wire to different definite positions, stored in the machine.

AUTOMATIC TURNTABLE

CROMA's turntable \varnothing 1150 mm allows you to produce 3D objects easily and automatically.
Heavy duty option: \varnothing 1500 mm with a pneumatic system.

MULTIRADIUS SOFTWARE

Ideal to create parts made of variable radii, especially in the building industry: arches, reservations, concrete molds, etc.

WIRE EXTENSION SYSTEM

This system allows the wire to extend up to 750 mm, offering the ability to cut angles over 45° and to make technical parts with a higher accuracy. It can be associated with the Stratoconcept software.

AUTOMATIC WIRE POSITIONING

Set the distance between each wire in the program, and the automat will display them with great accuracy. Combined with a conveyor, this is the perfect feature to produce mass productions of sheets and panels.

MULTIWIRE HARP, FIXED OR ROTATIVE

Up to 40 cutting wires at once. This option increases and multiplies the cutting productivity, reducing the production cost.
Rotative option: automatic tilting of the harp.

STRATOCONCEPT SOFTWARE

Use your machine as a 3D printer: Create prototypes and oversized objects in multiple layers, quickly and easily from your 3D file. With this technology, complex shapes and sharp angles can be done.

PC HOUSING - INCLUDED -

This ergonomic cabinet includes the electronics, a compartment for the computer, as well as a dedicated space for the storage of consumables. The computer itself is optional.

HORIZONTAL LATHE

The horizontal lathe is the ideal tool for making all types of columns or oversized objects, like an egg or a surfboard.

MATERIAL HOLDING SYSTEM

This device helps holding the thin panels vertically on the machine bed. Display as much sheets as possible on the edge, and start cutting to reach a great productivity.

ARCHITECTURAL PROFILES DATABASE

Database of more than 1 500 moldings and architectural profiles. Our designers have gathered an extensive collection of profiles ready to use.

SHAPEABLE FLAT WIRE TOOL

The \varnothing 0.3 mm round wire is replaced by a flat wire, or by a thicker round one \varnothing 0.9 mm. This thick wire can be shaped by hand with or without template, and it can take any form.

DETECTION OF WIRES BREAKAGE

If the Wire breaks during the cutting process, the software detects the defect and automatically pauses the machine, so you can either change the wire or bring it back to its starting position.

LOADING - UNLOADING OPTIONS

Conveyors, self-supporting wheels, side rollers...
Ask us for the most appropriate solution to your needs.

TURNKEY SOLUTIONS, CONTROL & SAFETY

Light barriers, machine enclosure, smoke aspiration, safety laser scanner...
Many solutions exist, let's talk about your needs.

Feel free to **contact us** for specific requests or for more information.
